

The *Principles of Good Scientific Practice* prepares you to conduct responsible research as an academic professional.

Workshop Description

Any responsible conduct of research should be based on honesty, accuracy, efficiency, and objectivity. The workshop *Principles of Good Scientific Practice* focuses on these scientific standards of international research. It raises awareness of the subject matter by providing students with a set of professional values and ethical norms as well as required competencies and skills to pursue scientific integrity. The content of the course follows the curriculum “Safeguarding Good Scientific Practice” of the Deutsche Forschungsgemeinschaft (DFG).

Specific Topics

- Introduction to good scientific practice
- Mentoring in the science system
- Misconduct in scientific research
- Conflicts of interest in scientific cooperation
- Data handling and publication process

Aim

The workshop instructs participants on the principles of good scientific practice. Doctoral candidates learn how to comply with the international values and standards of good scientific research and ethical practice.

Target Group

Doctoral candidates, Postdocs

Methodology

The workshop combines presentation and open discussion. Case studies and appropriate solutions for different policy options will be exercised. Participants are actively involved and encouraged to compare their experience of scientific work with the international standards of good scientific practice.

Term and Application

- March 21, 2019, 9.30am – 5pm
- Venue: 06108 Halle (Saale), Universitätsplatz 11 (Löwengebäude), Lecture Hall XII
- Group size: maximum 15.
- Workshop-Language: English.
- **Application period between February 18 and March 20**
email to: koordination@ingra.uni-halle.de
- Applications are considered in chronological order of receipt. You get information.

Trainer

Dr. Anne Hamker, Leipzig (<http://www.weiterbildung-wissenschaft.de>)
